### **DETAILED ACTION**

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Takahashi, Fujibayashi, Heide, Hasler, Matsuyama, Cohen et al, Shyu et al are made of record here as pertinent art to the claimed invention.

Each of the cited reference above discloses transistor control circuit for signal level control.

2. The following is an Examiner's Statement of Reasons for Allowance:

The prior art fails to disclose or suggest the specifics of an auto-on circuit for an audio device and a method for automatically turning a wireless transmitter for an audio source on or off response that including pinch off control of a FET, capacitor charge and discharge control, and audio sensing comparator with regard to audio peak comparison as recited and construed in independent claims 1 and 9.

Upon further review of Fujibayashi (US-4,536,808), it is determined that Fujibayashi fails to disclose or suggest at least audio peak comparison with an audio sensing comparator for auto on/off control as disclosed and claimed in the instant application. Applicant's invention of an auto-on circuit and method for automatically turning a wireless transmitter for an audio source as disclosed in the instant application comprises a particular combination of elements and functional steps which is neither taught nor suggested by the prior art.

3. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably

accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Xu Mei whose telephone number is 571-272-7523. The examiner can normally be reached on maxi flex.
